

1.

a. 0.18

b. 0.4

c. 0.52

$$d. \frac{P(\text{win}=\text{true} \wedge \text{weather}=\text{clear})}{P(\text{weather}=\text{clear})} = \frac{0.26}{0.4} = 0.65$$

$$e. \frac{P(\text{win}=\text{true} \wedge (\text{weather}=\text{cloudy} \vee \text{weather}=\text{rainy}))}{P(\text{weather}=\text{cloudy} \vee \text{weather}=\text{rainy})} = \frac{0.32}{0.6} = 0.53$$

2. $P(\text{practice} = \text{ture} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{true}) =$

$$P(\text{practice} = \text{true} \wedge \text{healthy} = \text{true} | \text{win} = \text{true}) * P(\text{win} = \text{true}) = 0.8 * 0.7 = 0.56$$

$$P(\text{win} = \text{false}) = 0.3$$

$$P(\text{practice} = \text{true} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{false})$$

$$= P(\text{practice} = \text{true} \wedge \text{healthy} = \text{true} | \text{win} = \text{false}) * P(\text{win} = \text{false})$$

$$= 0.4 * 0.3 = 0.12$$

$$P(\text{healthy} = \text{true} \wedge \text{practice} = \text{true}) = P(\text{practice} = \text{ture} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{true}) + P(\text{practice} = \text{true} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{false}) = 0.56 + 0.12 = 0.68$$

$$P(\text{Win} = \text{true} | \text{healthy} = \text{true} \wedge \text{practice} = \text{true})$$

$$= P(\text{practice} = \text{ture} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{true}) / P(\text{healthy}$$

$$= \text{true} \wedge \text{practice} = \text{true}) = 0.56 / 0.68 = 0.82$$

$$P(\text{Win} = \text{false} | \text{healthy} = \text{true} \wedge \text{practice} = \text{true})$$

$$= P(\text{practice} = \text{ture} \wedge \text{healthy} = \text{true} \wedge \text{win} = \text{false}) / P(\text{healthy}$$

$$= \text{true} \wedge \text{practice} = \text{true}) = 0.12 / 0.68 = 0.17$$

$$P(\text{Win} | \text{Healthy} = \text{true} \wedge \text{practice} = \text{true}) = P(\text{Win} = \text{true} | \text{healthy} = \text{true} \wedge \text{practice}$$

$$= \text{true}) + P(\text{Win} = \text{false} | \text{healthy} = \text{true} \wedge \text{practice} = \text{true})$$

$$= 0.82 + 0.17 = 0.99$$

3.

$$a. \text{ breeze: } \sim b_{1,1} \wedge b_{1,2} \wedge b_{2,1}$$
